

Snow Drift

A single-player endless runner game that takes place high up in the snowy mountains.

Key:

Complete - Task is finished/implemented

In Progress - Logic or prototype implemented, not finalized

Not Started - Logic or prototype not in project

(Blank) - Task for the week not started

Date	Task	Notes	Progress
1-19	Have all necessary programs installed	Unreal Engine, and Visual Studio 2022 Community	Complete
1-21	Completed the pitch		Complete
	Familiarize myself with the engine	I found tutorials that introduce the fundamentals of Unreal Engine.	Complete
2-4	Create a basic prototype	Get player movement and have the camera constantly follow behind the player.	Complete
	Add jump function to the player character		Complete
	Add static obstacles	First interactable object.	Complete
	Enable collision	Include short invulnerability after colliding with the obstacles.	Complete
2-11	Add player health	Max health of three. Every time the player collides with an obstacle, the player loses health. (UI not included)	Not Started
	Game over screen	After the player's health reaches zero!	Complete
	Generative obstacles	The level automatically generates obstacles.	Complete

	Terrain Generation	Endless terrain generation logic implemented.	Complete
2-25	Increase player speed	As time goes on, the player will automatically increase its speed.	Complete
	Main Menu	Allow the player to select either "Endless Mode" or "Quit" to exit the game.	Complete
	HUD and UI elements are created	Showcase player health, and score	Complete
	Expand generative terrain logic	Diversify the content generated in the level. Ramps, diverging paths, terrain, etc.	Complete
	Add sound effects and music	I could implement this earlier if time allows.	Complete
3-4		Midterms: Week spent studying and finishing working on other major projects due that week.	N/A
3-11	Prototype NPC riders and wildlife	These are the second type of obstacles, except they can move.	In Progress
	Save collectibles as currency	Currency will be saved.	Complete
	Save player's high score	Score will be saved.	Complete
	Add proper assets to the game	Character model finalized, terrain, and UI elements	Complete
	Prototype Item Shop UI	Will include a new option in the main menu that will access the item shop.	Not Started
3-14		Spring Break	N/A
3-18	Create 2 levels	Using the work done in endless mode, I begin creating levels that have an end goal to them.	Not Started
	Classic mode added to the main menu	This is how the players will be able to access and select the levels.	Complete
	Finalize NPC riders and wildlife	Modeling, sound effects, etc.	Not Started
3-25	Add bridges	This will increase the player's speed for a short while.	Complete

	Create 2 levels		Not Started
	Add pause functionality	Allow the player to pause the game during gameplay.	Complete
4-1	Item shop finalized	This whole week will be dedicated to finalizing the item shop	Not Started
	Purchasable new characters	Add two new characters. Can be switched through the item shop.	Not Started
	Purchasable new levels	Added to campaign mode	Not Started
4-8	Create 2 more levels		Not Started
	Polish game visuals, UI, and sound	Ensure debugging features work.	Complete
	Finalize playtesting	Find any remaining bugs and make final gameplay adjustments.	Complete
4-15	Fix remaining bugs		Complete
	Finalize game executable		Complete
	Finalize debugging features		Complete
BONUS	Add "Endless Hard Mode"	Item shop buffs do not carry over. The player character is faster and only has one health. Obstacles and collectibles will spawn more frequently.	
	Add "Steam Achievements"	If the game is played through Steam, players will be able to earn achievements.	
	Add 3 more levels	Purchasable extra levels. Difficulty on par with Endless Hard Mode.	
	Add cutscenes	Campaign Mode feature. Cutscenes will play after every 5 levels.	
	Boss Races	Using the AI built for pre-existing NPC riders, players will be able to race "Bosses". Unlike normal levels, you'd have to reach the goal in a certain time frame to beat the boss.
